Performance Consulting Associates to Exhibit at PaperCon 2015

DULUTH, GA – March 31, 2015 – Performance Consulting Associates (PCA), a leading provider of Maintenance Management and MRO Inventory Management solutions, will be exhibiting at this year’s PaperCon, the comprehensive conference for the paper industry sponsored by TAPPI, April 19-22, 2015 at the Georgia World Congress Center in Atlanta, GA. PCA consultants will be available in booth #146, to discuss how PCA’s services can help manufacturers in the pulp, paper and forestry industry to improve operations in the face of unpredictable and fluctuating raw materials supplies, oscillations in pricing and increased customer expectations.

“PaperCon assembles leaders in all aspects of the paper and pulp industry, said Richard DeFazio, president and CEO, PCA. “We plan to be one of the exhibitors that attendees of this year’s show remember long after it’s over.”

PCA experts will be available throughout the show to provide information and demonstrate the company’s “best practice” models.

“PaperCon has been a mainstay in the industry for a century,” said DeFazio. “We’re excited about the opportunity to demonstrate our services to existing and potential customers.”

About PCA
For almost 40 years Performance Consulting Associates (PCA) has provided professional consulting services including Strategic Planning, Asset Reliability Maintenance, MRO Supply Chain and related services to organizations so they can achieve the highest possible asset longevity and reliability at the lowest possible cost. PCA consultants have the deep understanding of critical Asset Maintenance and MRO Spare Parts needed to measurably improve asset reliability. That, coupled with the company’s methodology for improving operations and maintenance performance, while reducing the associated costs of maintenance, is what differentiates PCA from others in the field.

PCA serves a wide range of industries including chemicals and plastics, discrete manufacturing, food and beverage, mining, steel and construction, municipalities and water plants, pharmaceuticals, petroleum (oil and gas), pulp & paper and forest products, transportation and utilities.
